Education

Mohan Babu University

Bachelor of Technology in Computer Science and Engineering — CGPA: 8.98/10

July 2022 – May 2026

Tirupati, Andhra Pradesh

Sastra Junior College

Board Of Intermediate Education Andhra Pradesh — CGPA: 9.38/10

July 2020 – May 2022

Guntakal, Andhra Pradesh

Profile Summary

Computer Science graduate with a strong foundation in software engineering, computer networks, and backend development. Experienced in building full-stack applications using React.js, Node.js, Express.js, FastAPI, and Python, with hands-on experience integrating AI and NLP solutions. Skilled in designing RESTful APIs, solving technical problems, and translating complex requirements into practical, scalable solutions, with a passion for cloud, networking, and emerging AI technologies.

Experience

Projxty

Aug 2025 – Oct 2025

Web Development Intern

Remote

- Implemented responsive and reusable UI components using React.js and JavaScript to build scalable web interfaces.
- Architected and integrated backend APIs using Node.js and Express.js to support dynamic application features.
- Managed MongoDB databases ensuring efficient data storage and retrieval..
- Collaborated with a team of developers using Git and GitHub for version control, debugging, and feature releases.

Projects

ATS Resume Scorer | Python, FastAPI, Streamlit, spaCy, Sentence Transformers, Groq API, Supabase

Jun 2026

- Built a full-stack ATS Resume Scorer that evaluates resume-job description compatibility using NLP, semantic similarity, and LLM-generated feedback.
- Implemented resume parsing for PDF/DOC/DOCX files using spaCy and Sentence Transformers to extract skills and calculate ATS scores.
- Integrated Groq Llama 3 API for personalized resume improvement suggestions and category-wise ATS analysis with PDF report generation.
- Developed a FastAPI backend with a Streamlit frontend, featuring Supabase authentication, Google OAuth, and analysis history management.

Pharmacy Management System | React.js, Node.js, Express.js, MongoDB, Chart.js

February 2025

- Developed a full-stack pharmacy management application to manage medicine inventory, pricing, and expiry tracking.
- Implemented an inventory management module handling 3000+ medicines with storage conditions and category classification.
- Created an interactive analytics dashboard to visualize sales insights, low-stock alerts, and expiry notifications using Chart.js.
- Developed RESTful APIs with Node.js and Express.js to manage medicine records, invoices, and inventory updates.

Attention-Based Hybrid CNN for EEG Seizure Detection | Deep Learning, CNN, FFT

Nov 2025

- Developed a hybrid CNN-based deep learning model to classify seizure and non-seizure EEG signals.
- Extracted time-domain and frequency-domain features using CNN and Fast Fourier Transform (FFT).
- Implemented an attention mechanism to improve feature selection and model interpretability.
- Evaluated model performance using Precision, Recall, and F1-Score for reliable seizure detection.

Skills

Programming Languages: Java, Python, JavaScript, SQL

Core Concepts: Data Structures, OOP, DBMS, Operating Systems, Computer Networks, REST APIs

Web & Backend: React.js, Node.js, Express.js, FastAPI

AI & Machine Learning: NLP, spaCy, Sentence Transformers, Pandas, NumPy, Groq API

Tools & Platforms: Git, GitHub, Docker, Postman, VS Code, Jupyter Notebook

Certifications

AI & Machine Learning Program

2026

Apna College

Online

- * Learned machine learning fundamentals including data preprocessing, feature engineering, model training, and evaluation using real-world datasets.
- * Worked with Python libraries such as NumPy, Pandas, Matplotlib, and Scikit-learn to perform data analysis and build predictive models.
